-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Objections*

1. Claim 1 is objected to because of the following informalities: the word "of" right before "being" should be removed from line 12. Appropriate correction is required.
2. Claim 1 is objected to because of the following informalities: the word "shaft" in line 15 should be change to the word "axle" to maintain the language written in the beginning of the claim. Appropriate correction is required.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cabrera (US 5868413) in view of Ziperstein (US 1579589). Cabrera discloses a unicycle with handle comprising: a wheel (21) a rim (17), an axle (20) at the center of the rim, a connecting piece (18,19) connecting the axle to the rim, a pedal (22,23) driving the axle, a frame portion (fig 2 and 3) connected to the axle on one end and connected to the handle and saddle portions on the other end; said handle and the saddle portions are arranged at an angle from each other {{almost a 90° angle between the handle tube 34 and the seat 32 of the saddle portion}}. Cabrera fails to mention the suspension members arranged in intervals of 120 degrees. However; Ziperstein discloses a wheel comprising: a plurality of suspension members arranged in different angles (fig 3); a

couple of said suspension members when view separately have an arrangement with intervals of 120 degrees (see figure below, specifically the dotted lines). It would have been obvious for someone skilled in the art to add the wheel with suspension members into the monocycle disclosed by Cabrera, in order to be able to make the riding of the monocycle pleasurable, and in order to help the ride ability of the monocycle.

***Allowable Subject Matter***

5. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
